**RE: Request for Extension to Submit Response to
LARWQCB November 15, 2005 Directive
UST Program - Request for Additional Information
ARCO Facility 01946
332 Pico Boulevard
Santa Monica, California
LARWQCB ID No. 904050034A**

Dear Mr. Huang:

SECOR International Incorporated (SECOR), on behalf of Atlantic Richfield Company, submits this letter documenting SECOR's phone message request for due date extension and phone conversation confirmation of due date extension request in regards to referenced agency directive for the site.

Specifically, on January 13, 2006, Ms. Cathy Sanford of SECOR requested via phone message to Mr. Jay Huang of the Los Angeles Regional Water Quality Control Board (LARWQCB), a due date extension of one month to submit a response to the LARWQCB's November 15, 2005 directive requesting additional information regarding the referenced site. The LARWQCB requested the information be submitted by January 15, 2006. On January 23, 2006, SECOR received a verbal approval of the due date extension request. The additional information regarding the site will be submitted to the LARWQCB by February 15, 2006.

Thank you for your help with this matter. If you have any questions regarding the contents of this letter, please contact me at your earliest convenience at (714) 379-3366, extension 276.

Respectfully submitted,
SECOR International Incorporated

Cathy L. Sanford, PG 7956
Associate Geologist

UNDERGROUND STORAGE TANK PROGRAM - REQUEST FOR ADDITIONAL INFORMATION

ARCO STATION NO. 1946

332 PICO BOULEVARD, SANTA MONICA (ID NO. 904050034A)

Dear Ms. Miles:

On October 27, 2005, the City of Santa Monica Environmental Program Division transmitted this case to this agency due to concerns of groundwater impact from the subject site. The California Regional Water Quality Control Board, Los Angeles Region, is the public agency with primary responsibility for the protection of ground and surface water quality for all beneficial uses within the Los Angeles and Ventura counties. As such, we are the lead regulatory agency for overseeing corrective action (assessment and/or monitoring activities) and cleanup of releases from leaking underground storage tank (UST) systems at the subject site.

To facilitate our review, we would appreciate that you provide the following information regarding the referenced site that has not already been submitted:

1. Facility contact person's name and phone number (email address, if any);
2. Facility mailing address;
3. Contaminant release information (e.g., copy of Site Assessment Report);
4. Tank removal and/or repair information (include tank size and contents, removal and/or repair date);
5. Tank disposal documentation;
6. Copies of all previous site assessment and/or remediation report(s), if any;
7. Reports of all previous soil and groundwater sample analytical results, if any;
8. Name, telephone number and email address of your environmental consultant, if any; and
9. Copies of all correspondence regarding environmental assessment for the subject site.

In addition, pursuant to the California Health and Safety Code Chapter 6.75 (Section 25299.37.2) and Division 7 of the Porter Cologne Water Quality Control Act under AB 681, the Regional Board is required to notify all current fee title holders for the subject site or sites impacted by releases from underground storage tanks prior to considering corrective action and cleanup or case closure. If corrective action data from the site indicate that release(s) from the underground storage tank systems have impacted offsite property, you are required to provide to this Regional Board the name, mailing address, and phone number for any new record fee

title holders for the subject site and any offsite property(ies) impacted by releases from the subject site, together with a copy of county record of current ownership (grant trust deed), available from the County Recorder's Office, for each property affected. Or as an alternative, you can complete this Regional Board's "Certification Declaration for Compliance with Fee Title Holder Notification Requirements," for each site (available at

http://www.waterboards.ca.gov/losangeles/html/programs/ust/AB681_form.pdf).

If this information has been provided in the past, then you need not provide it again. Copies of future technical reports shall also be sent directly to the property owner of the site and to any other property owner(s) impacted by contamination from the site. You are also responsible to provide new contact information if the property owner(s) has been changed. The new owner shall comply with the requirement stated above. The above requested information is due to this Regional Board, no later than **January 15, 2006**.

Regulatory Requirement for Electronic Submission of Laboratory Data to the State Geotracker Internet Database

On September 30, 2004, the State Water Resources Control Board (SWRCB) adopted the resolution to revise regulations in Chapter 30, Division 3 of Title 23 of California Code of Regulations (CCR), which requires persons to ensure electronic submission of laboratory analytical data (i.e., soil or water chemical analysis) and locational data (i.e., location and elevation of groundwater monitoring wells), via the Internet to the SWRCB's GeoTracker database. The regulations and other background information are available at <http://geotracker.waterboards.ca.gov>.

In accordance with the above regulations, you are required to submit all future laboratory data over the Internet in the Electronic Deliverable Format to the SWRCB's GeoTracker database for any soil and/or groundwater samples obtained after September 1, 2001. This would include any sampling completed for underground storage tank system removal, site assessment activities, periodic groundwater monitoring, and post cleanup verification sampling. Per the same regulations, you are also required to submit locational data for all groundwater monitoring wells (i.e., latitude, longitude, and elevation survey data) together with groundwater information (i.e., elevation, depth to free product, monitoring well status, etc.) and a site map commencing January 1, 2002. Hard copy paper reports for the main contents are still required per Regional Board guidelines available at http://www.waterboards.ca.gov/losangeles/html/programs/ust/04_0621_e-QMRGuideline6-04.pdf.

Underground Storage Tank Expedited Agency Oversight Program (EAOP)

Based on local agency's case referral, the contamination at the subject site was confirmed. Therefore, you are required to take necessary corrective actions at the site, including site assessment and cleanup as needed.

California Environmental Protection Agency

Recycled Paper

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.

November 15, 2005

Per our prioritization criteria, the subject site is classified as a lower priority case. However, this case is qualified under our UST program's Expedited Agency Oversight Program (EAOP) as you have experienced in working with us in the past. In EAOP, the responsible party (RP) implements a reduced regulatory oversight "self-directed" process to complete the necessary assessment and cleanup at the site. After using your own judgement and completing the soil and/or groundwater corrective actions and confirmation sample results, the responsible party may prepare a package requesting for case closure. At that time, we will make a determination on case closure.

If you have any questions regarding this matter, please contact me at (213) 576-6715 or send me an email at jhuang@waterboards.ca.gov.

Sincerely,

Jay C. Huang, P.G., C.E.G.
